# A New Era of Web 3.0 Communication

## Our Mission

**An indispensable Web 3.0 Infrastructure built by all and made for all.**

Every successful innovation lies behind unrealistically ambitious goals, yet we are here to set the bold missions to bring the all-sought Internet to life.

We want a truly decentralized network, where surveillance and prying become old tales from the past.

We want a borderless network, where bits and communication flow freely.

We want a network that is genuinely made by people, and precisely for them, even better with economic incentives for every contribution.

## Few Words From The Founders

We can all agree that the year 2022 challenged us like no other. An unabating pandemic that claimed millions of lives around the world. Social and economic instabilities that preyed upon every living human being. And a few unexpected wrecks from the crypto world that stroke harshly upon people's faith in the industry.

Yet, it allowed us to see what are we capable of, both as a company and a community. Thanks to our solid Tech foundation, built delicately bit-by-bit, and the profound dedication of our team members of all departments and community crews from all over the world, we kept progressing throughout this year.

Now we are utterly fueled for the next coming year of 2023, excited by every inch to deliver a powerful network and resourceful service more than ever.

# 180,000

Full Consensus Nodes

## Blockchain Beyond Ordinary

## nPool Launch

providing a simple, fast, and secure way to run a few or many NKN mining nodes, with no requirement for any developer experience or a node wallet.

Reached more than 10,000 active access nodes, with a steady stream of daily income for each node.

## Mainnet Update Version 2.1.9

Introducing a new txn fee priority mechanism based on a fee per size. And of course, with performance optimization, bug fixes, and security patches.

## Surge Revamp

A Peer-to-Peer file sharing client designed to utilize blockchain technologies to enable 100% anonymous file transfer. It is end-to-end encrypted, decentralized, and open source.

In the past year of 2022, we sustained to grow and soared to new heights. This progress would not be possible without the extraordinary work of our team and staff, as well as the dedication of all our community members. We could not express our gratitude but fulfill our mission by providing exciting technologies and exceptional services in the upcoming year.

# A Year Beyond Expectation

# Vision of 2023

NKN is authentic to our inspirations and ambitions.

Our network is the true manifestation of our mission - A network built by all and built for all. We look to nMobile as the cynosure that will lead us toward a new era of secure communication. We will expand this true serverless communication beyond NKN and support all web 3.0 and web 2.0 identities and platforms, into something we call a "Universal Communication Service". We will eventually thrive on connecting nomads' land on the planet, through satellites, and eventually, get to the stars.

Thank you all for this whole year of an extraordinary journey, with love and support. We look forward to many more years of building, creating, delivering, connecting, and communicating, together.
